ORBITERRINGS BEST-OF-10

Most-In-A-Row

Use Your Imagination

Every time you change your position relative to the base or wrap the cord around the post, you must use your imagination to form a new swing.

(Legal Swing - Ball must travel at least five feet.)
(Swing Option – Use the original six Orbiter swing positions.)

ORBITER RINGS

By COPPLESTONE®

Best-of-10

Most-In-A-Row

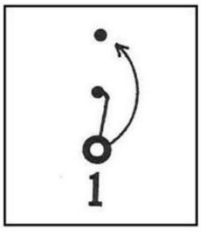

The Orbiting, Post-to-Post, Ring-Toss Game

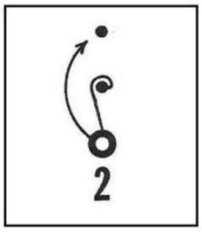

There are ten swings per player per inning.

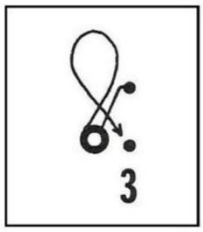

Players decide whether the game is comprised of one, three, or nine innings.
They decide who goes first and which swing type they will use. In any subsequent innings players play in an order from highest scorer to lowest.

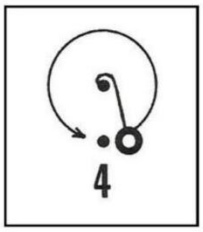

Players score additional points for scoring the most ringers in a row – a minimum of three in a row is required to qualify for these bonus points.

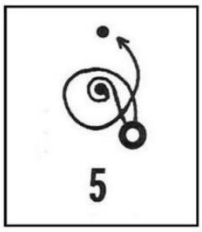

Players take turns and keep their scores.
The player with the most ringers and ringers in a row, wins the game. If a game ends with tie scores, those players play again until a clear winner is determined.

ORBITING RING TOSS

In the Bullpen

ORBITER – RINGTOSS / BASEBALL

Sportsfans! It's the bottom of the ninth, the score is tied, the bases are loaded, and there are two outs. Here's the swing. **It's a hit!**
No, it's not the kind with a bat and a ball. This is **Orbiter Baseball**. You're guaranteed to get more hits, more runs, and fewer errors with this crowd pleaser than did any of the baseball greats at the height of their careers.
Just swing the ring up onto the post. That's a hit! There are three bases to fill; after that, each hit drives in a run. A swing and a miss is an out. There are three innings per team. There are nine innings per game.
Go get 'em, and you will get 'em. More runs scored than in any other baseball game in history.
Anyone with a smooth swing has a big career ahead of them with this one: Orbiter – Ring Toss / Baseball.

Major League: Orbiter – Ring Toss / Baseball is the basis, with the addition of extra bases for more challenging swing types (as diagrammed).

PRO BALL: Major League is the basis, with the addition of defensive fielding to the game. Example: player (A) is up. He swings the ring up and on for a base hit. Player (B) can now field the play by executing the identical swing. If he swings the ring up and on, score it as an out. If he misses, the play remains a base hit. This goes for all swings. **Enjoy your game!**

A little about the Orbiter™

Origin: Anchored at English Harbor in Antigua, while on an extended cruise of the Caribbean, we were swept into a nightly game with the crowd at Admirals Inn.
They were swinging a brass ring tied on a string over onto a large hook anchored in a beam about eight feet away. The smiles on the faces and the wear on that hook showed this pastime's popularity.
I thought to myself, this game could be enjoyed in every home, office, and club if it were packaged and offered there.

I saw this as an opportunity and committed myself to that task.
It took some time to design, but here it is, all the entertainment of that hook and ring game in a package labeled Orbiter™ by COPPLESTONE®. Brass, wood or acrylic posts are anchored in a wood or plastic base. The ring swings from one taller uniquely angled post up onto a second shorter conversely angled post. (I refer to the posts as piers to recall Orbiter's nautical origin.)

To Create To Entertain

ORBITER RINGERS - PRO AM

- The Orbiter Ringers post-to-post, ring toss game, is a challenging, learn-and-teach, action skill game, to share with friends and family.
- Players take turns playing eighteen holes of six swings each. Each set indicates which one of six different swing types is to be used six times.
- Par indicates how many ringers must be made each hole, in order to make par 72 for the round.
- Use the scorecard below to keep your score, develop a handicap, and track your improvement over time.

- Level of expertise – Orbiter Ringers
- Level 1. Expert 72 – 108 ringers/game
- Level 2. Intermediate 36 – 71 ringers/game
- Level 3. Novice 1 – 35 ringers/game

About this item

- Orbiter is an orbiting ring toss, tabletop, action skill game.
- Decorative and Portable, Orbiter is a post to post, shot matching, pendulum device that shoe-cases a player’s eye to hand coordination skills.
- Orbiter is a Functional Art Sculpture serving the dual purpose of a challenging game.
- The object is to set the ring in motion, from one uniquely angled post in order to land the ring onto a second conversely angled post.
- Players are challenged to learn six orbiter swings, each one different with increasingly difficult swing paths.
- Once players understand how and why the ring moves through space, they will be able to perform the swings with confidence.
- Orbiter Ring Toss Race to 21: The first player to accumulate ringers with a point total of twenty-one, wins. It can be short and sweet if you know what you are doing or a bit of a struggle while players are learning. Any number can play.
- The Orbiter ring toss story began years ago at the Admirals Inn on the island of Antigua. The games creator David Copplestone was taking a sailing trip through the Caribbean in 1980. It was there that he joined a long line of people playing a Bimini ring toss game. The smiles on the faces and the wear on that hook showed this pastime’s popularity. As David played, he thought, “If there was a desktop version of this game, millions of people could enjoy it.”
